PROFILE

IT and data professional with hands-on experience providing first-level technical support to non-technical users, maintaining structured record and tracking systems, and producing clear user documentation. AWS Cloud Practitioner certified, with working knowledge of Microsoft 365, Windows environments, network connectivity troubleshooting and ICT asset record management. Builds web-based tracking systems in PHP/MySQL and works confidently in Excel, SQL and Power BI to validate, reconcile and report on operational data.

TECHNICAL SKILLS

End-User Support: First-level diagnostics and troubleshooting, Windows desktop and laptop support, printer and peripheral support, mobile device setup, request logging and escalation, user guides and training materials

Collaboration & Productivity: Microsoft 365, Outlook, Teams, Zoom, SharePoint/shared drive access, Microsoft Office (Advanced Excel, Word, PowerPoint)

Infrastructure & Security: Networking and Wi-Fi connectivity concepts, AWS (EC2, S3, IAM, cloud security), user account and access administration, cybersecurity awareness, data privacy and PII handling

Asset & Data Management: ICT asset and inventory record keeping, data validation and reconciliation, Airtable, MySQL, phpMyAdmin, SQL, Power BI dashboards and operational reporting

Development & Web: PHP, Python, JavaScript/TypeScript, HTML, CSS, Bootstrap, web hosting, domain and DNS configuration

EXPERIENCE

Freelance Web Developer and IT Support | WebNest, Accra *2023 - Present*

- Serve as sole technical point of contact for small business clients, resolving software, hosting, email, domain and connectivity issues and following each request through to confirmed resolution.
- Configure hosting environments, domain records, business email and user accounts, and produce written handover guides so non-technical clients can operate and maintain their own systems.
- Build and support web applications and reporting interfaces, including database-backed tracking tools with user authentication.

Support Officer | Ministry of Foreign Affairs, Ghana *2024 - 2025*

- Provided IT diagnostics and day-to-day troubleshooting support to registry and administrative staff, translating technical findings into clear resolution steps for non-technical colleagues.
- Maintained structured logs of document movement and file custody across the registry, applying the same discipline required for accurate asset and inventory record keeping.
- Identified inefficiencies in administrative file tracking and proposed workflow improvements that informed the design of a digital tracking system.

Data Entry Intern | Indie Designs, Accra *Oct 2022 - Dec 2022*

- Processed, classified and validated a dataset of 860+ Ghanaian senior high schools, reconciling raw inputs against source records to produce a clean, analysis-ready dataset.
- Introduced Airtable as a shared platform for the team, setting up multi-user access and collaborative data entry workflows.

SELECTED PROJECTS

- **Support Ticket System (Docker):** Containerised support ticket application covering request logging, assignment and status tracking, deployed and run locally in Docker.
- **Registry File Tracking System (PHP / MySQL, 2025):** Web-based asset and record tracking tool with status monitoring, custodian assignment and user authentication, built to replace a manual paper-based register.
- **Ghana High Schools Data System (Airtable / Excel):** Structured record system for 860+ institutions with validation rules and multi-user collaboration workflows.
- **Operations Dashboard (Power BI):** Interactive dashboard with filters, KPIs and trend analysis to support management reporting and decision-making.
- **Compliance Documentation Toolkits (Excel / Python):** Interactive checklist and dashboard workbooks built for an agribusiness client, with scoring logic and accompanying user guidance.

CERTIFICATIONS AND TRAINING

Advanced Cloud Computing, AWS Cloud Practitioner | Thrive Africa EduTech *2025*
Introduction to Software Engineering Job Simulation, incl. financial cybersecurity | Commonwealth Bank / Forage *Jun 2026*
Data Labeling Job Simulation, incl. PII awareness and quality control | Forage *May 2026*
Software Engineering Job Simulation, Python and test automation | Quantium / Forage *Apr 2026*
Learn HTML: Fundamentals and Learn CSS | Codecademy *2026*

EDUCATION

BA Political Science and Classics | University of Ghana, Legon *Jan 2021 – 2025*
General Arts | Mfantsipim Senior High School *September 2017 -2020*
